

TCS Guided Multi Pitch Gear List

Climbing Equipment

Climbing Harness

You will want a modern Rock Climbing Harness with belay loops and gear loops. You will want to size the harness to fit with multiple layers of clothing.

Helmet

Bring a helmet rated for climbing. Modern foam helmets are super lightweight and comfortable but are easy to break. We recommend a “burlier” model of foam helmet. Example: Petzl Meteor, Black Diamond Vision, for a cheaper more durable option look at the Black Diamond Half Dome Petzl Boreo or similar.

Rock Climbing Shoes

These should be comfortable shoes. If you are newer to climbing, focus on how the shoe fits your foot more than the model of the shoe. A perfect fit should have zero dead space. Size the shoes so you can wear them without socks but that they are comfortable. If the shoes are new, anticipate that they will stretch about a half size on average.

Chalk (optional)

Climbing chalk and chalk bag are optional.

Crack Gloves (optional)

Crack gloves are optional for routes with a bunch of anticipated crack climbing. It can be faster and less wasteful than athletic tape. We recommend the Black Diamond gloves as they have protection over the thumb, our next choice would be the OcuN Gloves.

Belay/Rappel Device

Please bring a “tube” style belay device with a clipping point to accommodate “guide” mode, also known as “plate” mode. Examples: We recommend the Black Diamond Guide ATC or the Mammut Nordwand.

Assisted Braking Belay Device (optional)

Strongly recommended for lead belays, but optional. We almost exclusively recommend the Petzl GriGri. If possible, try not to buy the Gri Gri + as it is heavier and clunkier to use.

Rappel Backup

Most people tie a “prusik loop” to be used as a rappel backup out of about 4 ft of 6mm accessory cord. It is also possible to buy a pre sewn loop, the most popular being the sterling hollow block.

Carabiners

Bring 2 locking carabiners and 2 non locking carabiners. You will want the locking carabiners to be “pear shaped” carabiners such as the black diamond rock lock. For the non lockers, we recommend D shaped Wire Gate carabiners such as the Black Diamond Neutrino. Please only bring carabiners rated for climbing, only purchase these from reputable brands. Do NOT buy random unmarked carabiners from Amazon, these have been tested and are not up to spec.

Slings

Please bring one 48” or “double length” nylon sling. This should not be a dyneema sling. This can be substituted with an adjustable tether such as a petzl connect.

Belay Gloves (optional)

Nut Tool (optional)

This is used for removing trad gear. Any nut tool on the market will do the job. Please bring one if you own one already. If you are flying or don't own one then don't go out of your way to pick one up.

Multi Pitch Climbing Pack

Please bring a small lightweight pack that you can climb with. Aim for something that is 10-15L and doesn't have a frame. For some routes, it may be feasible to approach with a larger pack, then leave things at the base, we will communicate route specifics prior to the day. Example: Black Diamond Rock Blitz

Clothing

Make sure to have layers appropriate for the day. Bring one more jacket than you think you will need. Reach out to your guide if you have any questions about what to bring.

Miscellaneous

Hydration

Make sure to have 2.5 to 3 liters of water capacity. We strongly recommend that at least one liter is in the form of a “hard bottle”, as in not a hydration bladder. Gatorade bottles are a great way of cheaply increasing capacity if you are traveling or forgot bottles.

Food

You will be responsible for your own food on the course. Make sure to plan ahead to accommodate breakfasts and dinners depending on where the course is held. Make sure to bring enough snacks during the days. Choose snacks and lunches you can eat on the go, that don't require cooking.

Sunscreen

Sunglasses

Headlamp

Make sure to have freshly charged or new batteries.

Approach Shoes

Make sure to have a supportive shoe appropriate for rocky approaches and scrambling.

Reach out if you have any questions about what gear or items you should bring.
